Ebasee
Smart Living Green Ebbasee
Ebasee Ltd., China

Company Profile

As a leading supplier in the low voltage electrics industry, Shanghai Ebbasee Electric Co., Ltd. products have been used for residential, commercial and industrial applications with its quality and service. EBASEE brand is recognized for its quality and reliability in an ever-increasing number of markets worldwide. So far EBASEE products have gained many international approvals, such as TUV, KEMA, CB, SEMKO, RoHS, CE, and CCC etc.

With quality raw materials and components supply, all products are manufactured to EBASEE's defined specifications. We have 4 semi-auto production lines, up to date quality control facilities, and well-trained skillful workers. Moreover, with a technical R & D team and fully equipped in-house laboratory, EBASEE factory can carry out efficient new products developing and daily production QC as well.

Ebasee have wide range cooperations with world leading companies in new products developing or OEM, ODM cooperation. Meanwhile we also process industry cooperation on intelligent home products, and work with some university such as Xi'an Jiao Tong University on project solutions. Ebasee is focused on achieving growth through the growth and success of its worldwide partners.

Ebasee, guided by the "market-oriented" philosophy, powered with the "Quick response and flexible supply" capability, can support our worldwide partners to compete against established global players to deliver the most comprehensive and cost-effective products and service in the market.

"Smart life, Green Ebasee"

EBS1TR

Thermal Relay

Function

EBS1TR Series overload relays apply to circuit of AC 50Hz or 60Hz, rated voltage to below 660V and rated current 0.1A~93A for AC motor overload and single phase protection during long time or intermittent long time service,which can also protect three phase serious imbalance and long starting time of motor or long time operation, can also be used for corresponding AC contactor for electromagnetic starter.

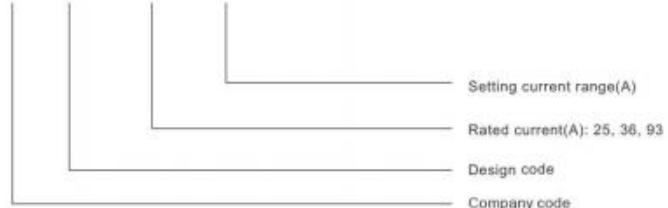

This product has innovative, elegant model and small installation area, functions such as temperature compensation, action indication, automatic and manual reset, stop with steady and reliable performance.

Thermal relay can be combined/connected with contactor or installed separately.

Standard: IEC 60947-4-1

Nomenclature

EBS 1TR - 25 / 18

Structural Features

- 3-phase bimetal type
- With overload and open-phase protection
- With setting current continuous adjustable apparatus
- With temperature compensation
- With action indication
- With testing mechanism
- With stop button
- With manual and automatic reset button
- With electrically separable normal open and normal closed contacts
- Installation method: plug installation with contactor or independent installation

Ambient temperature: The upper limit shall not exceed+40°C, the average value within 24 hours shall not exceed+35°C; the lower limit shall be not less than -5°C.

Atmosphere conditions: Relative humidity shall not exceed 50% when the ambient temperature is +40°C. Higher relative humidity is permissible at lower temperature, for example,it can reach 90% at 20°C. Special measures should be taken to address the dew occurred occasionally due to temperature changes.

Altitude: Installation altitude shall not exceed 2000m.

Anti-pollution degree: III.

Installation category:III.

Installation conditions: Install at proper working position, slant of contactor mounting surface shall not exceed $\pm 5^{\circ}$.Thermal relay shall be installed in places with no obvious shake or shock.

Environmental protection: Sufficient consideration of environmental protection factors has been taken in design process by adopting retrievable and naturally degradable materials in components.
